Project identification

Øresund Link

Type of project

Immersed tunnel

Project description

The Øresund Link is a tunnel and bridge connection between Denmark and Sweden. This 16.7 km long link is a direct traffic and train connection between Copenhagen and Malmö. The immersed part of the tunnel has a length of 3500 m and runs under the Drogden Channel. TEC has been responsible for all aspects of this tunnel design.

Scope of work

Employer's consultant for the design, tendering, detailed supervision and monitoring and all other related activities to complete the project according to the specifications.
